

# Queensland haulage incident update

**26 March 2024**

A road train, operated by our logistics contractor, carrying zinc concentrate from Dugald River Mine, was involved in a single vehicle incident on the Burke Development Road to the south of Quamby, late yesterday afternoon.

The driver was not seriously injured in the incident.

MMG is working closely with its contractor to understand the cause of the incident and to remove the truck from the road.

We will further work with local authorities to ensure a clean-up of concentrate and any impacted soil, which we expect will take a number of days.
